

DIAPHRAGM VALVES

Application

Diaphragm valves are designed for shut-off and sampling functions and are particularly suitable for use in pharmaceutical processes.

Features

Diaphragm valves are made in strict conformity with the criteria and tests required by the 3-A standards.

The valve design ensures complete insulation from external pollutants and self-drainage of all internal parts during CIP process.

The valve body is manufactured from Aisi 316L stainless steel and is press-forged, solution heat-treated, machined and polished. The manual and pneumatic controls are manufactured in Aisi 316L stainless steel to allow sterilization at high temperature.

The standard diaphragm material is food-grade EPDM. PTFE and FTM diaphragms are available as an option. Diaphragms are fabric-finished to give high mechanical strength.

Maintenance is reduced and top-entry with easy access and no need to remove the valve from the system.

Available body configurations are: sampling, two and three-way, tank bottom and modulating valves.

Valves can be operated both manually and pneumatically.

Pneumatic valves can be equipped with control units and a choice of electrical components.

Components

PARTS LIST		
1	Handwheel	Aisi 316L
2	Dowel	Aisi 304L
3	OR seal ring	NBR
4	Spindle	Aisi 316L
5	OR seal ring	NBR
6	Control	Aisi 316L
7	Compressor	Aisi 316L
8	Diaphragm	EPDM/PTFE/FTM
9	Valve casing	Aisi 316L
10	Thrust bearing	Brass
35	Leakage detection hole	

Technical Data

Max. product pressure:

- 1000 kPa (10 bar) for manual valves;
- 700 kPa (7 bar) for pneumatic valves.

Recommended working pressure: 600 kPa (6 bar).

General temperature range: -10°C +95°C (+15°F +205°F).

Diaphragms temperature range:

- EPDM: -30°C +140°C (-20°F +280°F);
- PTFE: -10°C +150°C (+15°F +300°F);
- FTM: -15°C +220°C (+5°F +430°F);

Finish:

- 150 grit (max R_a 0.76–0.89 μm , 30–35 $\mu\text{''}$).
- 240 grit (max R_a 0.38–0.51 μm , 15–20 $\mu\text{''}$).
- 400 grit ($\leq 0.2 \mu\text{m}$, $\leq 8 \mu\text{''}$).

Production range: from DN 10 to DN 50 and ½" to 2".

Connections: welding end, ferrule end.

Steel grade: Aisi 316L.
