

LIQUID METER TYPE FMO

INNOVATORS
IN FLOW TECHNOLOGY

FLUX LIQUID METER TYPE FMO OVAL ROTOR DESIGN

FLUX liquid meters type FMO are positive displacement flowmeters according to the oval rotor design. They are suitable for measuring thin up to high viscosity substances of maximum 500.000 mPas (cP). Seven different models are available to cover a range of flowrates from 0,1 to 350 l/min.

The meters are manufactured in PPS, aluminium and stainless steel, featuring a high measurement accuracy of $\pm 0,5\%$. By adaption of the oval rotors and seals, FLUX liquid meters type FMO suit a wide variety of applications. All models are certified for use in hazardous locations.

FLUX liquid meters type FMO can be used up to a maximum operating pressure of 55 bar and a maximum temperature of 80°C or 120°C, depending on the material of construction. An ease of operation is provided via multifunctional keys on a 7-digit LCD unit.

In conjunction with an interface amplifier, the FMO liquid meter can also be used as a pre-settable batch controller, actuating a magnetic valve or a pump. By the new FLUX Process Control System PCS a complete control system including an interface (RS 485/RS 232) for computerized liquid handling operations is now available.

Together with the liquid meters type FMC – nutating disc design – FLUX is offering a comprehensive range of flowmeters meeting almost every requirement.

Features and benefits

- flowrate of 0,1 – 350 l/min
- temperature up to 120°C
- operating pressure up to 55 bar
- oval rotors in stainless steel or PPS
- low pressure drop
- modular design, measuring unit, amplifier and digital display unit either integrated or separate
- ease of operation via multifunctional keys
- easy-to-read 13 mm 7-digit LCD unit
- display of quantity per operation, totalizer or instantaneous flowrate per minute
- automatic control of magnetic valves or a pump by using an interface amplifier or FLUX Process Control System PCS
- pre-settable batch controller up to 9999 litres per operation
- direct or remote control service
- explosion-proof according to Directive 94/9/EC-  Type Examination Certificate No. PTB 03 ATEX 2014
- display in litres, Imperial gallons or US gallons
- protected to IP 54
- fixed installation into pipework systems or portable use with FLUX pumps

In conjunction with the new Process Control System PCS the Liquid Meter Type FMO in pulse version without electronic LCD unit can be used as a complete control system for computerized liquid handling operations. The process control module PCM together with the complementary software allows the use of any PC as a central control unit, without having to interfere into its hardware. All that is required is a free serial interface RS 232 on the PC as well as an interface converter PCC.

TECHNICAL DATA

FLUX PROCESS CONTROL SYSTEM PCS COMPLETE, CONSISTING OF

FLUX Process Control Module PCM

230 V, 50/60 Hz.

max. 2 counters per module, 2 potential-free relays per counter to control up to 4 output devices (230 VAC, 8 A; 24 VAC/VDC, 8 A; 12 VDC, 8 A).

Serial interface RS 485 with screw terminals.

Sensor input (1 per counter):
potential-free mechanical contact (relay, conventional or Reed-type)
electronic counter (Hall effect sensor, capacity switch).

Frequency on sensor input: 0–200 Hz

Relay connections: screw terminals for cable section 1,5 mm²

Temperature range: -20 °C to +70 °C

Easy mounting on DIN-bar.

Display of status via LED.

Dimensions: 50 x 128 x 192 mm

Software on CD-ROM

System requirements:

Microsoft Windows 98 or higher.

Pentium Processor or higher.

32 MB RAM

Free harddisk space at least 6 MB.

Free interface RS 232.

CD-ROM-drive (for installation only).

FLUX Interface Converter PCC

RS 232 to RS 485 converter.

Galvanic separation up to 3000 VDC.

Automatic setting of Baudrate and data transmission parameters.

Supply voltage 10 to 30 VDC.

Temperature range: -10 °C to +70 °C.

Easy mounting on DIN-bar.

Temperature range: -20 °C to +70 °C.

Easy mounting on DIN-bar.

Including connecting cable DB 9 to PC, 2 m long.

Mains supply unit for PCC interface converter

230 V, 50 Hz

Output 12 VDC, 600 mA..

Including power supply cable.

Connecting cable, 5m long (PCM module – PCC interface converter)

two-way, twisted pair cable

Part No. A10 00 100

FMO – MAXIMUM FLOWRATE DEPENDING ON THE VISCOSITY AND A PRESSURE DROP OF MAX. 1 BAR

Type	FMO 4	FMO 10	FMO 40	FMO 50
Viscosity < 1 000 mPas	30,0 l/min	120 l/min	240 l/min	350 l/min
Viscosity < 3 000 mPas	27,0 l/min	108 l/min	215 l/min	312 l/min
Viscosity < 4 000 mPas	24,0 l/min	96 l/min	195 l/min	280 l/min
Viscosity < 5 000 mPas	21,0 l/min	84 l/min	170 l/min	245 l/min
Viscosity < 10 000 mPas	15,0 l/min	60 l/min	120 l/min	175 l/min
Viscosity < 25 000 mPas	12,0 l/min	48 l/min	95 l/min	140 l/min
Viscosity < 50 000 mPas	9,0 l/min	36 l/min	70 l/min	105 l/min
Viscosity < 100 000 mPas	6,0 l/min	24 l/min	45 l/min	70 l/min
Viscosity < 500 000 mPas	3,0 l/min	12 l/min	20 l/min	35 l/min

Values for viscosities exceeding 500 000 mPas (\approx cP) on request.

The performance data refers to liquids which are self-lubricating, non-adhesive or non-hardening.
With all transfer mediums the FLUX Liquid meters FMO have to be calibrated for the application parameters.

EXAMPLE

Stainless steel Liquid meters in combination with high viscosity pump F 560 S to transfer medium to high viscosity pasty substances.

YES!

I am interested in top class pump technology.

INNOVATORS IN FLOW TECHNOLOGY

All around the globe, FLUX is synonymous with top standards in pump technology. Whether it is barrel pumps, high viscosity liquid pumps, vertical centrifugal immersion pumps, air-operated diaphragm pumps, liquid meters, mixers or top class accessories – FLUX with its complete and comprehensive range is always the one to address to. Benefit from our competence. We look forward to hearing from you!
