BPS32 and BPS32Y Stainless Steel Balanced Pressure Thermostatic Steam Traps

Description

The BPS32 and BPS32Y are stainless steel maintainable balanced pressure thermostatic steam traps with straight connections. The BPS32 has an integral flat strainer screen and the BPS32 an integral cylindrical Y-type strainer. All pressure bearing components are produced by TÜV approved suppliers in accordance with AD-Merkblatt WO/TRD100. Both traps are unaffected by intertempers and are expliable as follows: waterhammer and are available as follows:-

Standard units	BPS32 and BPS32Y	having 'STD' fill capsule
Also available	BPS32CV and BPS32YCV	having 'STD' fill capsule and check valve.

Note: When placing an order always state capsule fill.

Capsule fill and operation:

Standard capsule - Is marked with 'STD' for operation at approximately 12°C below steam saturation temperature.

Optionally - The capsule can be supplied for sub-cooled 'SUB' operation at approximately 24°C below steam saturation temperature or near-to-steam 'NTS' operation at approximately 6°C below steam temperature.

Standards

This product fully complies with the requirements of the European Pressure Equipment Directive 97/23/EC.

Certification

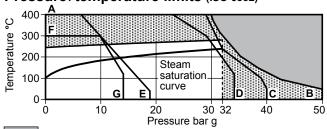

This product is available with certification to EN 10204 3.1. **Note:** All certification/inspection requirements must be stated at the time of order placement.

Sizes and pipe connections

1/2", 3/4", and 1" screwed BSP or NPT.
1/2", 3/4", and 1" socket weld ends to BS 3799.
1/2", 3/4", and 1" butt weld ends to EN 12 627.

DN15, DN20 and DN25 standard flange to EN 1092 PN40, ASME B 16.5 Class 150 and 300, JIS/KS 10K and JIS/KS 20K.

Pressure/temperature limits (ISO 6552)

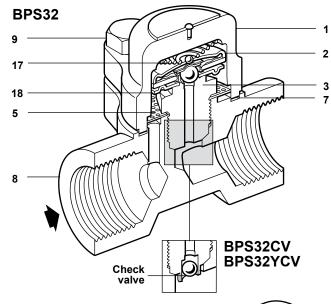

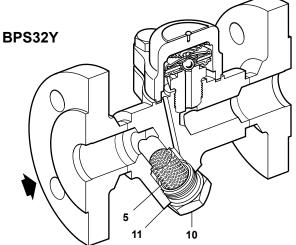

The product **must not** be used in this region.

The product should not be used in this region or beyond its operating range as damage to the internals may occur.

- Screwed, socket weld, butt weld and flanged ASME 300
- Flanged EN 1092 PN40 Flanged JIS / KS 20K Flanged ASME 150 Flanged JIS / KS 10K

Capacities

Safety information, installation and maintenance For full details see the Installation and Maintenance Instructions (IM-P005-04) supplied with the product.

Installation note:

The BPS32 and BPS32Y are designed for installation in any

position, horizontal or vertical. It is recommended that a non-return valve is fitted when discharging condensate into return lines where backpressure is experienced. It is also recommended that a diffuser is fitted when discharging to atmosphere.

For ease and maintenance, consideration should be given to fitting isolation valves upstream and downstream of the steam trap.

These products are recyclable. No ecological hazard is anticipated with the disposal of these products, providing due care is taken.

How to order

Example: 1 off DN20 Spirax Sarco BPS32Y balanced pressure thermostatic steam trap manufactured in corrosion resistant stainless steel. Having a Y-type strainer and 'STD' fill capsule for operation at approximately 12°C below steam saturation temperature. Flanged connections to EN 1092 PN40.

Spare partsThe spare parts available are shown in solid outline. Parts drawn in broken line are not supplied as spares.

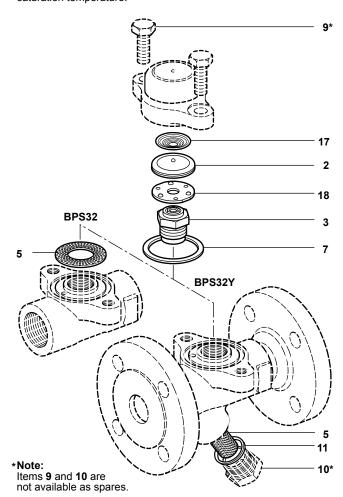

Available spares

Capsule and seat assembly	set		2, 3, 17, 18
Strainer screen	BPS32	(3 off)	5
Strainer screen and gasket	BPS32Y	(1 off each)	5, 11
Set of cover gaskets		(packet of 3)	7
Strainer cap gasket		(packet of 3)	11

How to order spares

Always order spares by using the description given in the column headed 'Available spares' and state the size, model number and capsule reference.

Example: 1 - Capsule and seat assembly set for a Spirax Sarco DN25 BPS32 - 'STD' fill capsule for operation at 12°C below steam saturation temperature.
