

VENA[®] MF-L

THE FIRST MULTISHAPE SILICONE HOSE IN FOOD QUALITY

PENDING PATENT

FEATURES

Venair is pioneer in creating the first conformable silicone hose in the market. The new Vena[®] MF is the result of a totally innovative project. The product has been developed by the R&D team of the company to satisfy the needs of the most demanding sectors.

This product's main advantage is its mouldability. The Vena[®] MF-L has the attribute of acquiring a certain shape and maintaining it even under extreme working conditions.

The couplings are reinforced twice in order to avoid breaks or grooves on the silicone during installation.

This product is specially recommended to food, cosmetic and pharmaceutical industries that require tailored pieces.

TECHNICAL INFORMATION

This reference is produced with **platinum-cured silicone** and equipped with **INOX 316L couplings**, and it is used to transport liquids or semi-fluids in the food, pharmaceutical and cosmetic industries.

The distinctive feature of this hose is that it is straight-shape made but **can be manually conformed** to obtain the desired shape. The hose can be handily moulded in all its area except for the delimited couplings zone.

The Vena® MF-L fulfils the **FDA, USP Class VI and BfR certifications**, among others.

The product is also available in industrial quality: Vena® MF

Please contact your salesperson to know further technical details.
