

# CO<sub>2</sub> Truck Filling Unit

## Truck Filling Unit, one piece

Truck Filling Unit for loading and unloading of liquid CO<sub>2</sub> from/to storage tank.

The truck filling unit consists of a high pressure pump with a capacity of 20 ton/hr mounted together with valves and instrumentation on a skid.

### Scope of supply:

- High pressure CO<sub>2</sub> pump
- Safety valves
- Overflow valve and stop valves
- Start/stop control for CO<sub>2</sub> pump
- Frame mounted

### Technical specification:

Filling capacity:	20 ton/hr
Difference pressure, max:	4,5 bar(a)
Discharge pressure, max:	25 bar(a)
AC motor:	8,6 kW
