LOT NUMBER EXPLANATION

Every Ballas Egg product label will clearly display a 4-digit “lot number” which identifies the date of manufacture. This lot number field appears in the lower-left corner of each label. The lot number will appear in the format of “AAA-B” where “AAA” represents the Julian calendar day of the year on which the product was made and “B” represents the last digit of the year number. For example, lot number “142-8” describes a product manufactured on the 142nd day of the year 2008.
